Driver's License: Category B

Professional Profile

Infrastructure engineer and team lead focused on production Linux systems, virtualization, automation, and tooling. Hands-on experience leading hosting operations, resolving complex production issues, and building internal tools and automation that reduce manual work and improve operational efficiency.

Technical Skills

Linux Administration: Ubuntu, AlmaLinux, CloudLinux

Virtualization: Proxmox, VMware ESXi / vSphere

Hosting Platforms: cPanel/WHM, Apache, LiteSpeed

Databases: MySQL, MariaDB, PostgreSQL

Programming and Scripting: PHP, Bash

AI & Automation: OpenAI API, MCP integrations, Codex CLI, Claude Code, OpenCode, multi-model workflows

DNS and Network Services: BIND, PowerDNS, DNSSEC

Caching and Performance: Redis, Varnish

Monitoring: Nagios

Version Control: Git

Selected Projects

OpsCheck — opscheck.tech

Public toolkit with 25+ practical tools for DNS, SSL/TLS, email security, and network diagnostics, built for fast day-to-day infrastructure troubleshooting.

Work Experience

System Administrator / Team Leader – Hosting Department

Orion Telekom · Full-time

Dec 2021 – Present · Belgrade, Serbia · Hybrid

- Leading the hosting team and planning infrastructure and operational activities.
- Independently designed and developed an internal platform that replaced manual hypervisor searches with centralized resource discovery across multiple virtualization environments and automated key operational workflows, saving an estimated 500+ staff hours annually.
- Administering and maintaining hosting environments, virtual servers, and hypervisor infrastructure.
- Resolving complex production issues and providing high-level technical support.

Technologies: BIND, PowerDNS, cPanel/WHM, Proxmox, Proxmox Backup Server, MySQL, Apache, Ubuntu, AlmaLinux, Nagios, Exim.

Developer – Software Distribution & Endpoint Security

NCR Corporation · Full-time

Oct 2019 – Dec 2021 · 2 yrs 3 mos · Belgrade, Serbia

- Worked on software distribution and package testing for ATM devices within the Global Software Distribution & Endpoint Security team.
- Handled Microsoft Security updates, APTRA Edge upgrades, and deployment processes for client environments.
- Supported environments covering around 30 banks in the United States and approximately 1,500 endpoints.
- Performed log analysis, issue identification, and troubleshooting in distributed systems.

Technologies: Batch, PowerShell, C# .NET, MS SQL, SCCM/GCSM, CA/EPM, AXEDA, GASPER, GEMS/GMSS, Microsoft SharePoint.

Professional Engagement

Authorized Representative of Orion Telekom in the RNIDS Co-founders' Conference.

Education

Medical High School in Zvezdara

2009 – 2013 · Field of study: Laboratory Technician
